Cautionary Statement Regarding Forward-Looking Statements

Any forward-looking statements made in the presentation in Exhibit 99.1 reflect our current views with respect to future events and financial performance and are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Such statements involve risks and uncertainties, which may cause actual results to differ materially from those set forth in these statements. For example, our forward-looking statements could be affected by pricing and policy term trends; increased competition; the impact of acts of terrorism and acts of war; greater frequency or severity of unpredictable catastrophic events; negative rating agency actions; the adequacy of our loss reserves; the Company or its subsidiaries becoming subject to significant income taxes in the United States or elsewhere; changes in regulations or tax laws; changes in the availability, cost or quality of reinsurance or retrocessional coverage; adverse general economic conditions; and judicial, legislative, political and other governmental developments, as well as management's response to these factors, and other factors identified in our filings with the U.S. Securities and Exchange Commission. You are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date on which they are made. We are under no obligation (and expressly disclaim any such obligation) to update or revise any forward-looking statement that may be made from time to time, whether as a result of new information, future developments or otherwise.

Investor Presentation

September 2017

MAIDEN HOLDINGS LTD

Forward Looking Statements

This presentation contains “forward-looking statements” which are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. The forward-looking statements are based on current expectations and beliefs of Maiden Holdings, Ltd. (the “Company”) concerning future developments and their potential effects on the Company. There can be no assurance that actual developments will be those anticipated by the Company. Actual results may differ materially from those projected as a result of significant risks and uncertainties, including non-receipt of expected payments, changes in interest rates, effect of the performance of financial markets on investment income and fair values of investments, developments of claims and the effect on loss reserves, decreases in existing and new client projected premiums, accuracy in projecting loss reserves, the impact of competition and pricing environments, changes in the demand for the Company’s products, the effect of general economic conditions, adverse state and federal legislation, regulations and regulatory investigations into industry practices, developments relating to existing agreements, heightened competition, changes in pricing environments and changes in asset valuations. The Company undertakes no obligation to publicly update any forward-looking statements, except as may be required by law. Additional information about these risks and uncertainties, as well as others that may cause actual results to differ materially from those projected is contained in Item 1A. Risk Factors in the Company’s most recent Annual Report on Form 10-K.

Non-GAAP Financial Measures

In presenting the Company’s results, management has included and discussed in this presentation certain non generally accepted accounting principles (“non-GAAP”) financial measures within the meaning of Regulation G as promulgated by the U.S. Securities and Exchange Commission. Management believes that these non-GAAP measures, which may be defined differently by other companies, better explain the Company’s results of operations in a manner that allows for a more complete understanding of the underlying trends in the Company’s business. However, these measures should not be viewed as a substitute for those determined in accordance with generally accepted accounting principles (“U.S. GAAP”). See the appendix of this presentation for a reconciliation of non-GAAP measures used in this presentation to their most directly comparable GAAP measures.

Maiden's Value Proposition

- 1 Significant line of business and geographical diversity across low volatility underwriting portfolio (Not focused on the property catastrophe reinsurance market)
- 2 Long-term relationships with targeted regional and specialty P&C insurers – 34-year operating history
- 3 Successful and stable multi-year strategic reinsurance relationship with AmTrust Financial Services, Inc. ("AmTrust") since 2007
- 4 Predictable and stable operating results
- 5 Highly efficient and scalable operating platform
- 6 Growing balance sheet scale and capital efficiency supported by the low-volatility model
- 7 Conservative investment portfolio
- 8 Strong commitment to rewarding shareholders through dividends

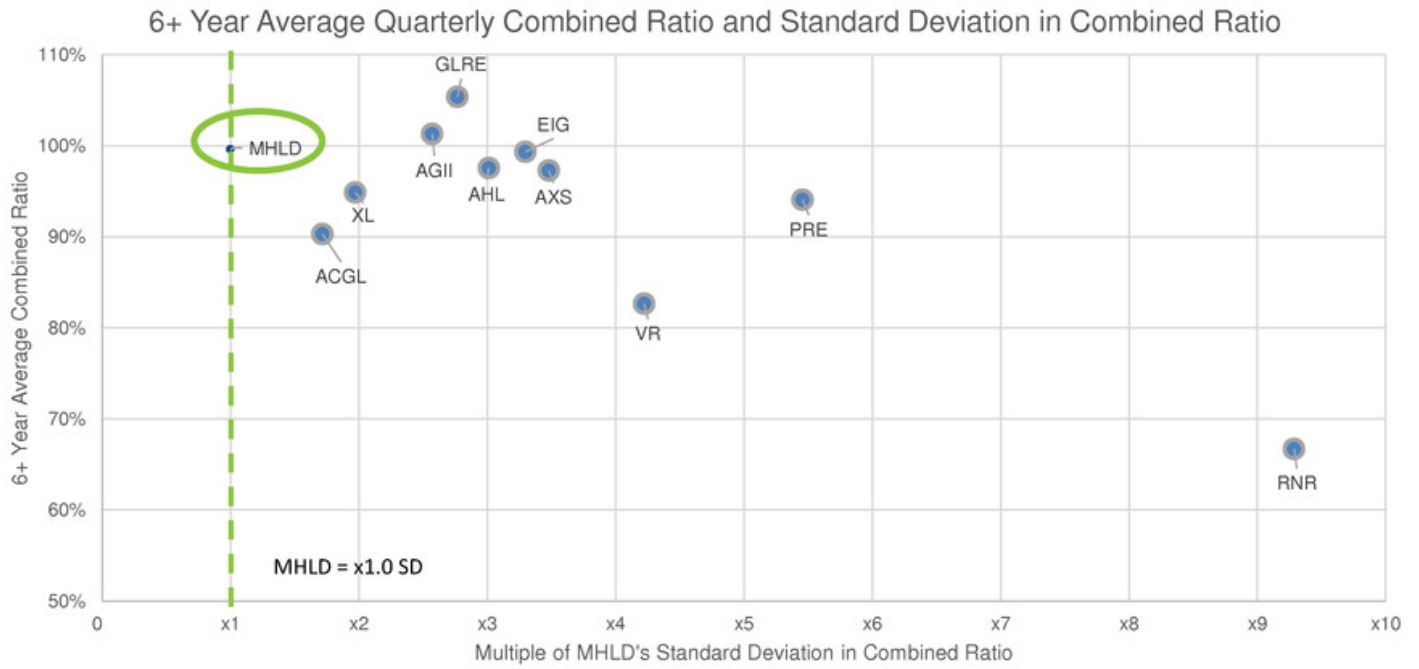

Maiden targets consistent underwriting profitability, above industry average growth and an operating ROACE* of 15% or greater

*ROACE is Return on Average Common Equity and is a Non-GAAP financial measure. We use ROACE as a measurement of profitability that focuses on the return to Maiden shareholders rather than using solely net income. Please see the definition of non-GAAP financial measures on the final page of this presentation for additional important information.

Maiden Carefully Minimizes Exposure to Catastrophe Risk

- Unlike most Bermuda reinsurers, Maiden is not a market for catastrophe risk
- To the extent that Maiden insures property exposures, occurrence limits and inuring catastrophe protections per contract are actively utilized to mitigate aggregation risk
- Maiden's risk tolerance in a 1-in-250 year event is less than half of the Company's estimated annual earnings
 - Maiden actively runs cat simulation models to ensure that risk parameters are not breached
 - A typical severity reinsurer exposes a significant percentage of capital in a similar return period event
- Maiden's assumed reinsurance portfolio has avoided significant impact from events such as Hurricane Ike, Hurricane Irene, Superstorm Sandy, Tohoku and New Zealand earthquakes

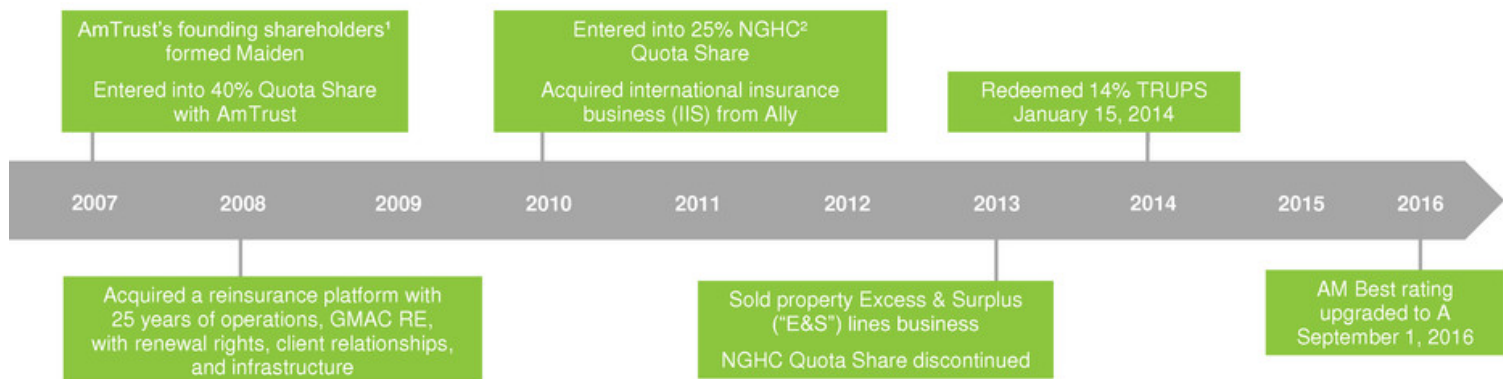

Predictable and Stable Operating Performance

Relatively stable and profitable combined ratio reflecting low volatility underwriting portfolio

* As of June 30, 2017

AmTrust Relationship

- Maiden maintains robust controls, procedures and governance. All transactions between Maiden and AmTrust require review and approval by the Maiden's independent directors (Audit Committee).
- AmTrust announced various adjustments and material weaknesses in its financial reporting.
 - These are unrelated to Maiden or Maiden's financial statements
 - Maiden has reported no such weaknesses or had any restatements
- AmTrust received a clean unqualified opinion from its auditor KPMG. Nothing in AmTrust's restatement is related to the premium or losses ceded to Maiden.
- AmTrust has been defending itself against short sellers for a number of years and unsubstantiated allegations put forward in recent news articles seem to be recycled attacks from those looking to gain from a fall in AmTrust's share price.
- Related party transactions are disclosed in Maiden's Annual Report on Form 10-K.

Diverse Portfolio of Low Volatility Underwriting Business

Majority of business made up of lower volatility proportional reinsurance

Low-hazard, profitable workers' compensation business

- 41% of last twelve months gross premiums written
- Focus on small premium, small-employer policies
- Significantly lower workers' compensation loss ratio vs. industry mainly reflecting AmTrust's specialization and leading position in low-hazard segment

LAST TWELVE MONTHS Q2 2017 GROSS PREMIUMS WRITTEN

Last Twelve Months* Gross Premiums Written = \$2.908 billion

* As of June 30, 2017

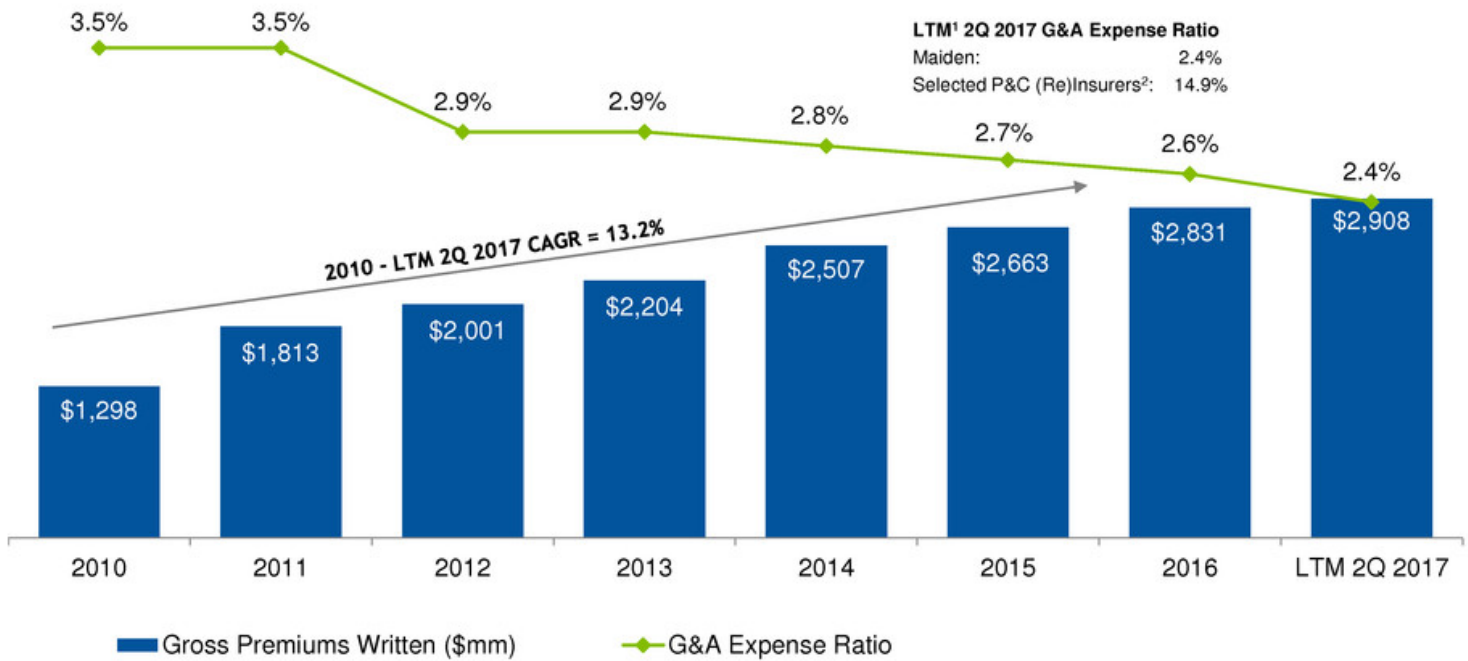

A History of Profitability

- Maiden has a history of achieving underwriting profits
 - In 36 of 40 quarters of Maiden's existence underwriting profits were achieved; 3 of 4 loss making quarters were dominantly driven by commercial auto challenges in the U.S. market
 - Achieved underwriting profit in all but one year
 - Majority of Bermuda (re)insurers have experienced quarterly and full year underwriting losses in past 10 years
- Commercial auto has been the primary culprit of the adverse quarters:
 - US Diversified Reinsurance segment commercial auto adverse development of over \$130 million in recent years
 - Over 90% from 2011-2014 and over 50% from Underwriting Year ("UY") 2013
 - The majority recognized since the beginning of 2016
 - Commercial auto premiums were \$580 million for UY 2011 through 2014 and peaked in 2013
 - AmTrust \$38 million of commercial auto adverse development in 2016

Commercial Auto Overview

- Absent the impact of commercial auto the balance of Maiden's business has performed within expectation
- Heavily reduced amount of exposure since the 2014 UY
- Accounts renewed during 2015, 2016, and 2017 received needed rate increases; others were non-renewed
- Maiden has been proactive with claims audits focused on recognizing loss emergence promptly
- Factors influencing commercial auto adverse experience
 - Inexperienced drivers, young and older
 - Distracted drivers
 - Aggressive plaintiff bar
 - Increased hauling activity
 - Improving economy – more miles driven

Non-GAAP Financial Measures

In presenting the Company's results, management has included and discussed in this presentation non-GAAP financial measures within the meaning of Regulation G as promulgated by the U.S. Securities and Exchange Commission. Management believes that these non-GAAP measures, which may be defined differently by other companies, better explain the company's results of operations in a manner that allows for a more complete understanding of the underlying trends in the Company's business. However, these measures should not be viewed as a substitute for those determined in accordance with U.S. generally accepted accounting principles ("U.S. GAAP").

Operating Earnings and Operating Earnings per Common Share: In addition to presenting net income determined in accordance with U.S. GAAP, we believe that showing operating earnings enables investors, analysts, rating agencies and other users of our financial information to more easily analyze our results of operations in a manner similar to how management analyzes our underlying business performance. Operating earnings should not be viewed as a substitute for U.S. GAAP net income. Operating earnings are an internal performance measure used in the management of our operations and represents operating results excluding, as applicable on a recurring basis, net realized and unrealized gains or losses on investment, foreign exchange and other gains or losses, amortization of intangible assets and non-cash deferred tax expenses. We exclude net realized and unrealized gains or losses on investment and foreign exchange and other gains or losses as we believe that both are heavily influenced in part by market opportunities and other factors. We do not believe amortization of intangible assets are representative of our ongoing business. We believe all of these amounts are largely independent of our business and underwriting process and including them distorts the analysis of trends in our operations. We also exclude certain non-recurring expenditures that are material to understanding our results of operations. During the third quarter of 2014 and 2015, we exclude impairment losses. Beginning in the second quarter of 2014, we exclude our divested E&S business as it has been in run-off for over one year following the sale to Brit effective May 1, 2013. Similarly, beginning in the fourth quarter of 2014, we exclude results from NGHC as this business segment has been in run-off for one year following the mutual cancellation on a run-off basis of our contract. Furthermore, in Q1 of 2014 and Q2 2011, we exclude the accelerated amortization of the Junior Subordinated Debt discount and the write off of the associated issuance costs. In Q2 2016 and Q2 2017, we also excluded the write off of the amortized issuance cost related to the 8.25% Senior Notes redeemed in June 2016 and 8.0% Senior Notes redeemed in June 2017. In Q1 2014 and Q4 2013, we also exclude the interest expense incurred on our 2013 Senior Notes prior to the redemption of the outstanding Junior Subordinated Debt given the one time nature of the additional funding cost. For 2011 we exclude transaction expenses related to the IIS Acquisition as these are non-recurring.

Operating Return on Average Common Equity ("Operating ROACE"): Management uses operating return on average common shareholders' equity as a measure of profitability that focuses on the return to Maiden common shareholders. It is calculated using operating earnings available to common shareholders (as defined above) divided by average Maiden common shareholders' equity. Average common shareholders' equity for the twelve months ended December 31, 2016 is adjusted for the period the Mandatory Convertible Preference Shares - Series B are outstanding (prior to mandatory conversion date of September 15, 2016). Management has set as a target a long-term average of 15% Operating ROACE, which management believes provides an attractive return to shareholders for the risk assumed from our business.

See the previous two pages of this presentation for a reconciliation of non-GAAP measures used in this presentation to their most directly comparable GAAP measures.
